

Grit-o'Cobs[®] Corncob Blasting Media

Professional Results. Exceptional Value.

Grit-o'Cobs corncob is the ideal blasting media for a large variety of jobs, as it is considerably less aggressive than sand and other substrates. Most commonly used for cleaning and prepping wood, aluminum, and fiberglass surfaces, Grit-o'Cobs has been trusted by professionals around the world because of its efficiency and ease of use.

MAKING LIGHT WORK OF BIG JOBS SINCE 1957

- Safe and effective cleaning media
- Less aggressive than sandblasting
- Works with standard equipment
- High efficiency reduces amount of required material
- Easy to use, no training required
- Virtually dust-free
- Mohs hardness of 4.5
- Fast and easy clean up
- Spent material can be used as spill absorbent
- Easy to handle 40 lb bags

POPULAR GRIT-O'COBS BLASTING APPLICATIONS INCLUDE

- Log cabins and historic buildings
- Electrical insulators and transformer substations
- Wood and fiberglass boat hulls and aluminum pontoons
- Metal finishings and fixtures
- Grease and grime removal from construction and off-road equipment
- Metal and plastic auto parts
- Masonry, cement, brick, and wrought iron work

NATURALLY ECO-FRIENDLY

Grit-o'Cobs material starts as corncobs grown on Midwestern American farms. A durable and renewable resource, Grit-o'Cobs is 100% environmentally-friendly. Grit-o'Cobs is all-natural, virtually dust-free, non-toxic and silica-free, and requires no special disposal, depending on specific use.
